# HONEYWELL VERTEXT EDGE

# **Toxic Gas Monitoring System**

# Go low. Get advanced low-level detection and a lower cost of ownership.

Honeywell Vertex<sup>TM</sup> Edge delivers the reliable performance and versatility of Honeywell Vertex<sup>TM</sup> — with a lower cost and easier experience. To help you protect people and assets while reducing downtime, Honeywell Vertex<sup>TM</sup> Edge provides:

- Authentic Chemcassette® technology for enhanced standard of accuracy
  The system detects highly toxic gases quickly and definitively down to parts
  per billion (ppb) as evidenced by a clear, easy-to-view stain on chemically
  treated tape. This technology, pioneered by Honeywell, delivers low-level
  gas detection you can count on.
- Monitoring of more than 40 toxic gases

  Start with as few as eight sampling points and add up to 72. Place each point up to 400 feet (120 meters) away for flexible reach.
- Lower cost of ownership
   Get a lower system price than Honeywell Vertex™ plus Chemcassette® tapes for ammonia, hydrides and mineral acids that last six months instead of the usual three. That means double the usage at a lower operating cost.
- Smart, intuitive interface for enhanced performance and simple operation Touchscreen and large icons make it easy to see gas readings, alarms, event logs, real-time trends and overall system status. Minimal training required.

## **MORE FEATURES & BENEFITS**

### Straightforward maintenance to reduce costly downtime:

### **FRONT ACCESS**

Easily service the power and data cables with a clear view of the touchscreen and Chemcassette® analyzers. Pullout tray makes it easy to replace and service pumps.

### **NO-SCREW SERVICE PANELS**

Access the inside of the unit with keylock and latch - no screwdriver needed.

### SIMPLIFIED OUTPUT

Vertex Edge offers Modbus TCP and Modbus RTU for interfacing to your sites control systems.

### SMART REMINDERS

Use the touchscreen to set customized reminders for maintenance tasks; clearly see which elements to service.

### **EASY TUBE MANAGEMENT**

Quickly identify sampling tubes for corresponding analyzers, so you can address a fault or install a new point.

### **DURABLE DESIGN**

Steel door stands up to traffic, while a splash-proof cap protects the system from overhead liquid exposure.

### VERTEX EDGE SPECIFICATION SHEET

OVERALL SYSTEM DIMENSION	
Size	76" x 24" x 35"
Weight - Full loaded condition	~900lbs (~408kg)
Weight - Empty rack	~655lbs (~297kg)
ANALYZER	
Size	22" x 13" x 6"
Weight	≤ 27lbs (12kg)
POWER REQUIREMENTS	
Operating voltage	208V~240VAC, 15A (230V) & 114VAC ~ 126VAC, 30A (120V)
POWER CONSUMPTION	
Normal condition	1.3 kVA, 0.86 Power Factor, 1.1 kW @120VAC
Maximum condition	1.4 kVA, 0.84 Power Factor, 1.2 kW @128VAC
DISPLAY AND OUTPUTS	
	15.6" wide screen monitor with capacitive touch interface Display gas reading, alarm & instrument status real-time base
Visual	Provide real-time trend chart and gas event snapshot trend chart
visuat	Event logging including maintenance/instrument fault and gas alarm
	Multiple searching option for the event <b>LED indicator:</b> Normal (Green), Alarm 1 (Red), Alarm 2 (Red), Fault (Yellow)
Digital communications	TCP/IP and RTU Modbus, OPC (Option)
SECURITY	ion/in dilatito indebad, or occupationy
	Role-based access control
	Support HTTPS
CERTIFICATION AND SPECIFICATION	
	EN 50270 and EN61010-1
	UL/IEC 61010-1 RED, FCC for RFID
PERFORMANCE	NEB, 1 OCIOI NI IB
I EN ONMANGE	Refer to product manual for complete gas list
TRANSPORT SYSTEM	Note: to produce manual for complete gas to:
Flow rate	2.1 LPM
Transport time	Less than 50 seconds up to 325ft with thin wall tube (0.190"ID); Refer to user manual for details
Sample line tubing	1/4 in. (6.35 mm) 0.D. x 0.190in. (4.83 mm) (Thin wall)
Tubing length	Up to 400ft (120m) with thin wall
	1/2 in. (12.7 mm) 0.D. x 3/8 in.
Exhaust line tubing	(9.5 mm) I.D. Teflon tubing
Exhaust length	Up to 50 ft. (15 m) maximum
OPERATING CONDITIONS	
Temperature	59°F to 95°F (15°C to 35°C)
Humidity	20-80% RH
Altitude	-1000 ft. (-305 m) to 6000 ft. (1829 m) above sea level
Pollution degree	2
WIRING REQUIREMENT	
Power	Single phase power, Minimum 14 AWG (10 AWG for 115V)
Digital	Modbus TCP/IP: CAT5 shielded cable or equivalent (RJ45 connector);
- Jigitat	Modbus RTU: 2-wire stranded, shielded cable or equivalent (24-14 AWG)
